

# Examples of four aluminium profiles

With different types of LEDs, PCB thicknesses and DALINE shades

Type of LED	CSP	CSP	MP	MP
PCB thickness (mm)	0.8	1.6	0.8	1.6
DALINE shade (SHD1/SHD2)	SHD1	SHD1 or SHD2 * <sup>1</sup>	SHD2 * <sup>2</sup>	SHD2

\*<sup>1</sup> SHD2 is easier to install

\*<sup>2</sup> MD LEDs are higher than CSP LEDs and to uphold the desired height for the lens focal point, SHD2 should be used.
